2017	<b>72.3</b>	70.2	61.3	91.0	<b>B</b>	5 <sup>th</sup> of 30

Finland's Retirement Income System consists of a basic state pension, which is income-tested, and a range of statutory earnings-related schemes.

\*Reminder: Each year, the Index undergoes some small changes. These changes include questions being added, removed or altered, as well the addition or removal of nations participating in the Index. Although the effects of these changes are very minimal, some of the information in this table can be impacted. A more detailed outline of these changes can be found in Chapter 3 of the Full Report for each edition.

## The 2017 Report's Policy Recommendations

The overall index value for the Finnish system could be increased by:

- Continuing to increase the minimum pension for low-income pensioners
- Continuing to raise the level of mandatory contributions that are set aside for the future
- Increasing the labour force participation rate at older ages as life expectancies rise
- Introducing arrangements to protect the pension interests of both parties in a divorce
