

ARGENTINA

Overall Index Score 39.2

Overall Index Grade D

Argentina's retirement income system comprises a pay-as-you-go social security system together with voluntary occupational corporate and individual pension plans which may be offered through employer book reserves, insurance companies or pension trusts.

The overall index value for the Argentinian system could be increased by:

- raising the minimum pension available to the poorest aged individuals
- raising the level of household savings
- introducing tax incentives to encourage voluntary member contributions to increase retirement savings
- increasing coverage of employees in occupational pension schemes through automatic membership or enrolment, thereby increasing the level of contributions and assets
- introducing a minimum level of mandatory contributions into a retirement savings fund
- improving the regulatory requirements for the private pension system

The Argentinian index value increased from 38.8 in 2017 to 39.2 in 2018 primarily due to an increase in the score relating to the Worldwide Governance Indicators.
